

# Project Linus

Providing Security Through Blankets

Start with a 1-1/2 yard long piece of fleece

1. Carefully trim off selvage edges, leaving a very straight, clean edge then fold fleece in half (with selvage edges together)
2. Pin measuring tape thru both layers 6-inches from the selvage edge
3. Cut 1" wide fringe, cutting both layers at the same time
4. Remove measuring tape; unfold fleece
5. Tie each separate piece of fringe with a simple knot at the top (where it connects to the blanket)
